

Com2uS to make traffic management fun on your mobile

Direct taxis, tanks, and automobiles

Ain't it frustrating when the traffic lights go red just as you reach them? It wouldn't happen if you were in charge – and now you'll get your chance, thanks to *Traffic!*, a new game from Com2uS.

The game has you directing cars, taxis, tanks and, erm, UFOs in a crowded city, trying to stop them crashing into each other to rack up as many points as possible.

There's also a mission-based mode where challenges include directing traffic in the dark, and causing deliberate crashes in order to catch criminals. The game's due out here soon.

Com2uS also gave us a sneaky peek at two other upcoming titles.

Virus is a spooky survival horror game featuring narrow corridors, gloomy lighting and, yes, man-munching zombies.

Meanwhile, *Mini Game Pack* is a collection of seven one-thumb mini-games, promising running, jumping, racing, smashing, skipping, driving and dodging. Sounds like a night out with Mel Gibson if you ask us.

Click through the screens above to get a sneaky peak at all three games.
