Fire Torpedoes! Space Battles Fought With Computer

By Jeff Levinger

Spiraling near the sun for added acceleration, the thin silver ship swiveled slowly, firing its. space torpedoes steadily, creating a spiral wave of death ahead of it. As it swept past the sun, a hail of answering rockets flashed by, barely missing, and the sudden explosion of another ship lit the space behind. The scope flickered, and the two ships appeared again at diagonally opposed points with the sun as a center. The controls for each changed hands, and the game began anew.

The game is Space War, played on the display screen of the PDP-1 computer in 26-260, with the aid The central sun (there is an enof a program written mainly by Steve Russell of the Harvard Computation Center. around the sun without falling in, and then to destroy the other ship with a limited number of torpedoes and a long reload time between shots. One danger (since reprogrammed) which destroyed many a hopeful skipper was due to the fact that torpedoes ignored the sun: and running into your own torpedo as you orbit is a rather humiliating defeat.

It is possible to go beyond the space pictured, in which case you wind up coming out of a new corner to begin again. This is known Two spaceships circle the sun on as the curvature of space. Torpedo number, duration, and reload speed (no machine-gunning) are variable, easily adjusted for beginners or experts.

For Parents' Weekend the PDPrate to fifth magnitude on the 1 will run this game for parents with gravity . . . and if you fall p. m. and 6 p. m., with a special o minescent square where your thing parents shouldn't miss. As Each person controls his ship ship was, which appears if your a simplistic preview of future war ship is hit by a torpedo or the games, it might well be classified were this report to fall into the

1200 Walkers Rally For Peace

By Dave Ecklein

professors, house-Students, wives, children, and others converged on the Massachusetts Civil Defense Headquarters in Natick last Friday afternoon to begin a Peace Walk to the Boston Common. The walk, sponsored by the New England Turn Toward Peace, got underway with 88 initial participants, and grew to over 1200 by the time it reached the culminating TTP Rally at the Common Saturday afternoon. Balmy spring weather and a generally friendly and open-minded reception by citizens along the designated route contributed to the high morale and enthusiasm of the walkers.

After resting at a Unitarian Church in Wellesley Hills, where the walkers were provided with a snack, the group hiked on until

5 Activities Council Seats To Be Elected Next Month

Elections for five rotating seats on the Activities Council will be held in May. The Activities Council, the legislative and managing body of the Association of Student Activities, is composed of fourteen permanent member activities and five rotating members who are elected annually.
