Infinite Wheel

Not a game per se, but definitely fun to play with—maybe “Web toy” would be a more appropriate category to file this one under. [Infinite Wheel](#) is a series of “Dub Selector” Flash movies by [Jim Johnstone](#) that borrows [samples](#) from various [Dub](#) artists and presents them in a virtual playground in which you click, drag, and mouse-over the unique and compelling interactive controls to create your own dub music mixes. Wonderfully engaging presentation—sweet! [Click](#).
